# About REKATHON

REKA App Builder, an online *no-code* app development platform was developed in 2018 that can be used to quickly develop digital solution.

REKA has been a catalyst for digital transformation, significantly driving innovation both within and outside the organization.

**REKATHON** is organized to promote the use of REKA and encourage “digital innovation for all” while celebrating the innovation culture among **peREKA** (REKA/LEAP-based app creators).

The event will also feature various REKA-related activities, including knowledge-sharing sessions and REKA app development coaching, as part of Sarawak Civil Service Innovation Week 2024.

Co-organized by

In conjunction with

# Who Can Participate?

**REKATHON** is aimed at organizational and individual participation including the public and private sectors, with innovative ideas for digital transformation with REKA App Builder.

The participation is opened to any REKA (or LEAP-based) App Builder users.

Members of the organizing committee, secretariat, and judges are not permitted to participate.

REKA / LEAP-based Platforms

## Participation Requirements

- ✓ Product's core function must be created with REKA (or LEAP-based) App Builder
- ✓ Product has never won any competition
- ✓ The product is fully compliant with all applicable laws and does not infringe upon any existing intellectual property rights.
- ✓ Each submission should have no more than four team members

## Assessment Criteria

If there are more than 10 participations, shortlisting will be based on the following criteria:

- Problem Statement – 20%
- Proposed Solution – 25%
- Conceptual Design – 25%
- Impact – 20%
- Benefits to stakeholders – 10%

Shortlisting decision is final

# Intellectual Property Rights

The participant must ensure that they own the intellectual property rights to their submitted project. They are fully responsible for ensuring the submission does not infringe on any intellectual property, industrial property, copyright, or image rights and will bear all responsibility in relation to third parties, absolving the organizer of any liability.

If the project is shortlisted, the participant grants the organizer permission to publish the project info in any format and medium to promote REKATHON.

# Participation Process

# Submissions

09 – 18

SEPT

OCT

Online Platform

# Project Pitching

04

DEC

Digital Village

The presentation will be evaluated by 5 judges.

Each team will be given **10 minutes** to present their product with another 5 minutes for Q&A session.

Judging criteria:

| Criteria                    | Sub-Criteria                     | Description  |
|-----------------------------|----------------------------------|--|
| Product Background<br>(20%) | Problem Statement<br>(5%)        | Clearly define the problem the app aims to solve.  |
|                             | Proposed Solution<br>(5%)        | Describe the proposed solution and how it addresses the problem.                                 |
|                             | Conceptual Design<br>(5%)        | Outline the conceptual design, including key features and functionalities.                       |
|                             | Relevance & Feasibility<br>(5%)  | Explain the relevance of the app to the target audience and market needs.                        |
| Product Quality<br>(35%)    | UI/UX Design<br>(10%)            | Evaluate the user interface and user experience design for intuitiveness and appeal.             |
|                             | Functionality<br>(15%)           | Assess the app's functionality and how well it performs its intended tasks.                      |
|                             | Performance & Efficiency<br>(5%) | Performance and efficiency of applications in improving work processes and resource utilization. |
|                             | Security & Privacy<br>(5%)       | Evaluate the app's measures to protect user data and ensure secure operations.                   |

(cont.)

| Criteria                              | Sub-Criteria   | Description  |
|---------------------------------------|--|--|
| Innovation & Creativity<br>(15%)      | Unique Features<br>(5%)  | Highlight the unique features that differentiate the app from existing solutions.                          |
|                                       | Creative Approach<br>(5%)                                      | Describe the creative process behind the app's design and development.                                     |
|                                       | Problem-Solving<br>(5%)  | Demonstrate how the app offers a novel solution to the identified problem.                                 |
| Impact<br>(15%)                       | Impact to Economic, Environment, Social and Governance<br>(8%) | Describe the app's potential impact on economic, environmental, social, and governance aspects.            |
|                                       | Benefit to Stakeholders<br>(7%)                                | Outline the benefits the app provides to various stakeholders, including users, developers, and investors. |
| Presentation & Documentation<br>(15%) | Visual Presentation<br>(5%)                                    | Ensure the app is presented visually in an appealing and professional manner.                              |
|                                       | Documentations completeness<br>(5%)                            | Provide comprehensive documentation, including user manuals and technical specifications.                  |
|                                       | Pitch and Communication<br>(5%)                                | Prepare a clear and compelling pitch that effectively communicates the app's value proposition.            |

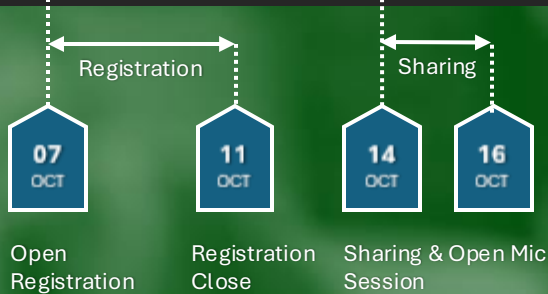

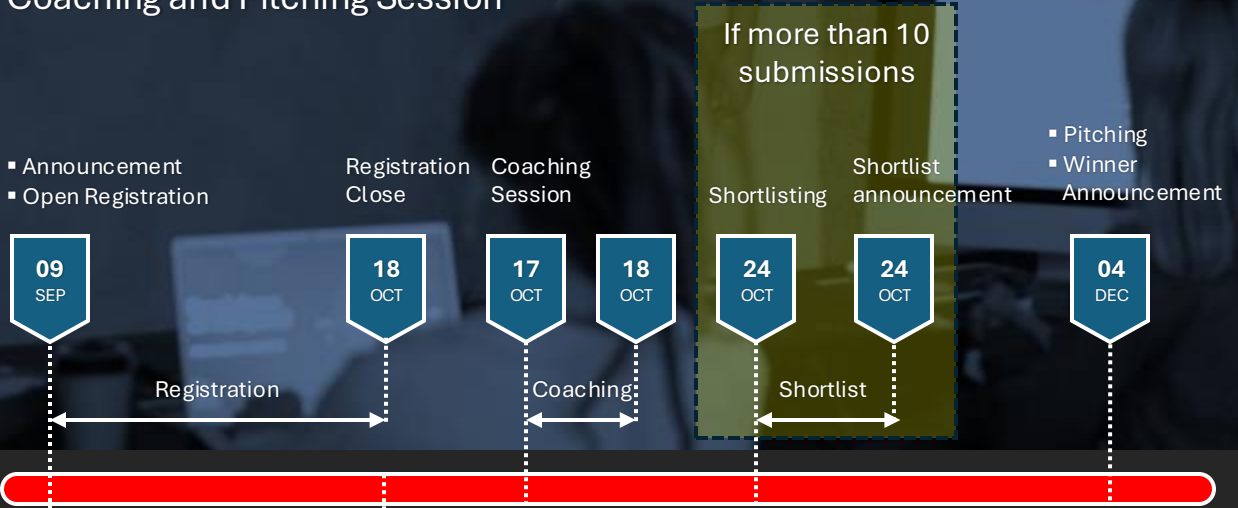

Judge's decision is final and absolute
